

RebelInuX White Paper

RebelInuX (REBL)

Clément Landormy, Founder of RebelInuX

June 19, 2025

The Rebellious Meme Coin Inspired by the Spirit of the Dog that
Rips the Rules!

Introduction

RebelInuX is more than just a meme coin — it's a movement built on rebellion and community empowerment. Inspired by the fearless Shiba Inu, our project embodies boldness, humor, and decentralization. Join us as we disrupt, entertain, and redefine the future of meme tokens.

1 Current Tokenomics

The RebelInuX's tokenomics are designed to promote sustainability, community growth, and project development through transparent and balanced token allocation.

1.1 Emission Schedule

The total supply of RebelInuX tokens is fixed at **13 billion (13,000,000,000)** with **9 decimals**. No inflation or additional minting is planned; any future adjustments will be transparently communicated.

1.2 Token distribution

- **Team & Development (30%):** Funds support hiring, software development, project management, and ongoing technical improvements.
- **Community & Marketing (20%):** Funds enable marketing campaigns, community initiatives, partnerships, and educational content.
- **Liquidity Pool (40%):** Resources provide liquidity, facilitate trading, and ensure market stability.
- **Reserve (10%):** Maintained as a contingency for strategic opportunities, emergencies, or future development.

Distribution of Funds

1.3 Token Sale and Allocation Details

Liquidity will be added via Raydium using a single wallet, while remaining funds are allocated across separate wallets for operations, development, and reserves. Future token distributions will follow the predefined allocations for the team, investors, partners, and ecosystem growth, as detailed in this white paper.

2 Future Tokenomics

RebelInuX's future tokenomics focus on sustainability and community growth through transparent token burns, buy-backs, and vesting strategies, aimed at enhancing token stability and long-term value.

2.1 Future Burning Mechanism

We are committed to implementing a transparent and systematic token burning process. This mechanism will involve periodically reducing the circulating supply by burning a percentage of tokens from designated wallets. Details such as the frequency and percentage of tokens to be burned will be communicated clearly through updates on our website and in the white paper. Stay tuned as we work toward making our ecosystem more deflationary and community-driven.

2.2 Vesting and Lock-up Periods

Tokens allocated to the team and advisors will be subject to vesting schedules over a specified period to promote long-term commitment. Additional lock-up periods may also apply to certain allocations to ensure ecosystem stability.

2.3 Token Utility

RebelInuX tokens will serve various functions within our ecosystem, including governance voting, staking for rewards, participation in liquidity pools, and potentially, transaction fee discounts.

2.4 Incentives and Rewards

Participants will earn rewards through staking, liquidity mining, and community activities, aligning incentives to foster ecosystem growth.

2.5 Future Buy-Back Protocol

In addition to token burns, we plan to implement a buy-back mechanism where a portion of the project's revenue or treasury funds will be used to purchase tokens from the open market. This buy-back aims to:

- Reduce circulating supply and support token price stability.
- Demonstrate ongoing commitment to token value appreciation.
- Potentially be complemented by periodic burns of the bought-back tokens.

Details such as the percentage of revenue allocated for buy-backs, frequency of buy-back events, and mechanics of execution will be transparently communicated as the protocol is developed.

3 Governance and Community Participation

RebelInuX (REBL) was initially launched via [oriontools.io](#) as a community-oriented meme token, emphasizing fun, engagement, and collective participation. Currently, the token primarily functions as a meme coin, without on-chain governance mechanisms in place.

3.1 Future Governance Framework

Recognizing the importance of community involvement in shaping the project's future, the RebelInuX team aims to implement a comprehensive governance system. This will enable token holders to actively participate in key decision-making processes, including proposing initiatives, voting on proposals, and influencing strategic directions—fostering transparency, decentralization, and shared ownership.

3.2 Proposed Governance Protocols

The governance system will leverage Solana-compatible protocols such as the Solana Program Library (SPL) Governance or Realms. These platforms will facilitate token staking, proposal submission, and voting, ensuring the community's voice is central to the project's evolution.

3.3 Community-Driven Development

This transition aims to strengthen community trust, promote active engagement, and align project growth with supporter interests. The team is committed to developing an inclusive, secure, and scalable governance model that supports sustainable, community-led decision-making and long-term success.

4 Decentralization & Security

At RebelInuX, our core principles of transparency, decentralization, and security form the foundation of our project. We believe that true empowerment arises from eliminating centralized points of control and fostering a community-driven environment.

To uphold these principles, the project has **renounced the Freeze Authority, Mint Authority, and Update Authority**. This means:

- **No central authority can freeze or mint new tokens** without community consensus, ensuring fair distribution and safeguarding against malicious actions.
- **All updates and governance decisions are driven by the community**, establishing a trustless and democratic environment.
- **The project operates on Solana's secure and scalable platform**, leveraging its robust security features to protect our community and assets.
- **Regular audits and transparent reporting** will be conducted to ensure the security and integrity of token allocations and smart contracts.

By fully decentralizing our operations, we aim to build an unstoppable rebellion—one resilient to censorship, manipulation, and centralized control. Our commitment to transparency and security is designed to foster trust and ensure that RebelInuX remains a truly community-led movement.

5 Our Rebellion Roadmap

Project Roadmap Timeline

6 About the Founder

Clément Landormy — A dedicated expert in cryptoassets and blockchain technology with over three years of specialized experience gained through his PhD in economics. His expertise encompasses cryptoasset valuation, econometrics, and market analysis.

Clément has conducted extensive empirical research using on-chain data from Binance, Coinbase, and CoinMetrics, focusing on market risks, asset pricing, and financial forecasting. He is proficient in quantitative analysis, financial modeling, programming, and data visualization.

His mission is to develop transparent, innovative, and community-driven blockchain projects that advance the industry and foster trust within the ecosystem.

7 Meet Our Inspiration: RebelInuX's Model

RebelInuX is more than just a meme coin — it's a reflection of the loyalty, playfulness, resilience, and strong character embodied by our beloved dog, Idilys.

About Idilys

Idilys is a Shiba Inu known for her unwavering loyalty, sharp intelligence, courage, and strong personality. She's a true rebel at heart — she doesn't listen much to orders and hates being on a leash. Despite her independence, she's loving and fiercely loyal. She embodies the spirit of rebellion, community, and perseverance, serving as the perfect symbol of strength and freedom.

Why Idilys?

Our dog serves as the mascot and inspiration for RebelInuX because:

- **Loyalty:** Like our community, Idilys is fiercely loyal and dedicated.
- **Resilience:** Always bouncing back, just like our token aims to grow and adapt.
- **Independence:** She's strong-willed and refuses to be controlled — a true reflection of rebellion.
- **Playfulness:** Bringing joy and fun, which is at the heart of our meme culture.

8 Join the Rebel Pack and Unleash the Rebellion

We believe in challenging the status quo—fighting injustices in the crypto sphere and beyond. As a community, we stand united in pushing boundaries, standing up for what's right, and making a difference.

We invite our community to share stories, photos, and memories of their dogs, creating a stronger bond and making RebelInuX a truly community-driven project rooted in love, loyalty, and rebellion.

Together, we are more than just a meme — we are a family that fights for change.

Connect with us on these rebellious platforms and become part of the wildest crypto movement:

Join us, share your stories, and help build a vibrant, rebellious community that stands strong together!

9 Token Creation and Verification

The **RebelInuX** token was officially created on **18 June 2025** at **20:38 UTC** using [OrionTools.io](#), a trusted platform for deploying Solana-based tokens.

Token Address:

BfVVGU2an66FVL6qCrX8gJDdgw6EwzmjG672YYD7REmM

For transparency and community verification, you can view the token's details, transaction history, and current status on [Solscan](#).

This documentation ensures that the creation process is transparent and verifiable by all community members and stakeholders.
